

LZ Glossary

ADCC	analog to digital converter count	DS	Data Sparsifier
AF	analysis framework	DSCM	DS Control and Monitoring
ALP	axion-like particle	DSECM	DS expert control/monitoring
API	application programming interface	DSM	Data Sparsification Master
APT	Applied Plastics Technology Inc.	DSNB	diffuse supernova neutrino background
Ar	argon	DSP	digital signal processor
ASME	American Society of Mechanical Engineers	EB	electron beam
atma	atmospheres absolute	EB	Event Builder (Chapter 11)
BEGe	broad energy germanium	EB	Executive Board (Chapter 15)
BHUC	Black Hills State University Underground Campus	ECN	engineering change notice
BLBF	Berkeley Low Background Facility	ECR	engineering change request
BNL	Brookhaven National Laboratory	ER	electron recoil
BVPC	Boiler and Pressure Vessel Code	ETFE	ethylene tetrafluoroethylene
CAD	computer-aided design	EVT	engineering validation test
CAMS	Center for Accelerator Mass Spectrometry	EXO	Enriched Xenon Laboratory
CCD	charge-coupled device	FCP	fluorocarbon polymer
CCV	Center for Computation and Visualization	FEA	finite element analysis
CDM	cold dark matter	FEP	fluorocarbon polymer
CDMS	Cryogenic Dark Matter Search	FIFO	first in, first out
CFD	computational fluid dynamics	FNAL	Fermi National Accelerator Laboratory
CMB	cosmic microwave background	FPGA	field-programmable gate array
CMSSM	constrained minimal supersymmetric standard model	FSM	finite state machine
CNC	computer numerical control	FSR	first science run
CNS	coherent neutrino scattering	FWHM	full width at half maximum
CP	charge parity	FWTM	full width at tenth maximum
CORBA	Common Object Request Broker Architecture	G2	generation-2
CRC	cyclic redundancy check	Gd	gadolinium
CTA	Cherenkov Telescope Array	Gd-LS	gadolinium-liquid scintillator
CUBED	Center for Ultra-low Background Experiments at Dakota	GD-MS	glow-discharge mass spectrometry
CUORE	Cryogenic Underground Observatory for Rare Events	Ge	germanium
CW	Case Western	GERDA	GERmanium Detector Array
CWRU	Case Western Reserve University	GPFS	Global Parallel File System
DAMA	DARk MATter experiment	GUI	graphical user interface
DAQ	data acquisition	HDMI	High Definition Multiple Interface
DB	database	HEP	high-energy physics
DC	Data Collector	HPGe	high-purity germanium
DCM	DAQ Control and Monitoring	HPSS	High Performance Storage System
DD	direct detection	HV	high voltage
DDC	direct digital controller	HVP	high-voltage connection port
DE	Data Extractor	HX	heat exchanger
DEAP	Dark Matter Experiment using Argon Pulse-shape discrimination	I/O	input/output
DECM	DAQ Expert Control/Monitoring	IB	Institutional Board
DM	DAQ Master	ICD	interface control document
DOT	Department of Transportation	ICE	Internet Communications Engine
DRIFT	Directional Recoil Identification From Tracks	ICP-MS	inductively coupled mass spectrometry
		ICP-OES	inductively coupled plasma optical emission spectroscopy
		ID	indirect detection
		IOSERDES	input/output serial/deserializer

IR	infrared	PHA	Preliminary Hazard Analysis
J-LAB	Jefferson National Accelerator Laboratory	phe	photoelectron
LAB	linear-alkylbenzene	PID	proportional integrative derivative controller
LAN	local area network	PLC	process loop controller
LAr	liquid argon	PLC	programmable logic controller
LBF	LBNL Background Facility	PMO	Project Management Office
LBNL	Lawrence Berkeley National Laboratory	pMSSM	phenomenological minimal supersymmetric standard model
LCDM	Lambda Cold Dark Matter	PMT	photomultiplier tube
LCDM	Laboratory for Cosmological Data Mining	POD	Pulse Only Digitization
LC-MS	liquid chromatography-mass spectrometry	PPA	particle physics and astrophysics
LD	angular-momentum (L) dependent	ppb	parts per billion
LHC	Large Hadron Collider	P-PEP	Preliminary Project Execution Plan
LKP	lightest Kaluza-Klein particle	ppt	parts per trillion
LLNL	Lawrence Livermore National Laboratory	PSD	pulse shape discrimination
LN	liquid nitrogen	psi	pounds per square inch
LRF	light response function	psia	pounds per square inch absolute
LS	liquid scintillator	psig	pounds per square inch gauge
LSD	angular-momentum (L) and spin (S) dependent	PTFE	polytetrafluoroethylene, or Teflon®
LSZH	low smoke zero halogen	QCD	quantum chromodynamics
LUX	Large Underground Xenon	QE	quantum efficiency
LVDS	low-voltage differential signaling	RAID	redundant array of independent disks
LXe	liquid xenon	RAL	Rutherford Appleton Laboratory
LZ	LUX-ZEPLIN	RC	run-control
MC	Monte Carlo	RQ	reduced quantity
MDA	minimum detectable activity	RTD	real-time dispatching or resistance temperature detector
Mg	magnesium	S1	prompt scintillation signal
MIE	Major Item of Equipment	S2	proportional scintillation signal
MIT	Massachusetts Institute of Technology	SAL	Surface Assembly Laboratory
MITR-II	MIT Reactor II	SBR	styrene-butadiene rubber
MLI	multilayer insulation	SD	spin-dependent
MOU	memorandum of understanding	SDSMT	South Dakota School of Mining and Technology
MSSI	multiple-scintillation single-ionization	SDSTA	South Dakota Science and Technology Authority
mwe	meters water equivalent	SHM	standard halo model
NAA	neutron activation analysis	SI	spin-independent
NAIAD	Nal Advanced Detector	slpm	standard liters per minute
NERSC	National Energy Research Scientific Computing Center	SMU	Southern Methodist University
NEST	Noble Element Simulation Technique	SPEC	standard performance evaluation corporation
NEXT	Neutrino Experiment with a Xenon TPC	SPHE	single photoelectron
NIC	network interface card	SRV	storage and recovery vessel
NIM	nuclear instrumentation module	SS	stainless steel
NMSSM	next-to-minimal supersymmetric standard model	SSD	solid state disk
NR	nuclear recoil	SSD	solid-state drive
OSHA	Occupational Safety and Health Administration	SSF	Surface Storage Facility
OVC	outer vacuum cryostat	SSR	second science run
PAB	Project Advisory Board	STFC	Science & Technology Facilities Council
PCB	printed circuit board	STP	standard temperature and pressure
PDE	photon detection efficiency	SURF	Sanford Underground Research Facility
PDSF	Parallel Distributed Systems Facility	SUSY	supersymmetry
PFA	perfluoroalkoxy	TD	technical difficulty

TEC	total estimated cost
Th	thorium
Ti	titanium
TMHA	trimethyl hexanoic acid
TPB	tetraphenyl butadiene
TPC	time projection chamber
TTL	transistor – transistor logic
U	uranium
U/Th	uranium/thorium
UC	University of California
UCL	University College London
UDP	User Datagram Protocol
UKDMC	UK Dark Matter Collaboration
USD	University of South Dakota
UW-PSL	University of Wisconsin Physical Sciences Laboratory
VAR	vacuum arc remelting
VCR	a type of vacuum fitting
VJ	vacuum jacket
VUV	vacuum ultraviolet
WARP	WIMP Argon Programme
WBS	Work Breakdown Structure
wDSM	Data Sparsification Master
WIMP	weakly interacting massive particle
WMAP	Wilkinson Microwave Anisotropy Probe
Xe	xenon
XRF	X-ray fluorescence
ZE3RA	ZEPLIN-III Reduction and Analysis
